

# INTRODUCING CONTACTLESS CARDS AT UBI

A Contactless Chip Card allows you to tap your debit card against a merchant terminal, rather than inserting or swiping your card.

## IS THIS ICON DISPLAYED ON YOUR DEBIT CARD?

If this icon is on your debit card, you have a Contactless Card.

This means you can tap to pay anywhere you see the Contactless Symbol.

## FIND THE ICON AT THE PAYMENT TERMINAL

If you see the Contactless Symbol at a merchant terminal, you will be able to tap to pay for your goods or services.

## TAP TO PAY

Tap or hold your Contactless Card near the Contactless Symbol on the checkout terminal to complete your transaction.

For debit transactions, you may be asked to enter your Personal Identification Number (PIN) or sign.

No contactless terminal? No problem! Simply swipe or insert your debit card as you normally would.
